Congratulations Monica! Please make sure your staff and mgt team are aware that I know how important it is to receive thanks from Dave McNeill. The issues in Utah never seem easy and the discussions we need to have are oft times difficult, but with your teams professionalism, expertise and the relationships you have built, we, together make progress implementing the responsibilities we both have. He has not always been so gracious or thankful and it is a credit to your group that we continue to make this progress and are credible implementers of the CAA.

Monica and Scott,

My staff are really excited about the actual publication of this in the Fed Register. I don't know if they've expressed this to you or not, but thank you guys very much for all of your and your staff's work on these, too. It has been really great to see them all working so closely together on the PM2.5 issues over here. And haze. And ozone. And the Uintah Basin. A lot of respect and trust and cooperation going into and coming out of this.

Just thought you'd like to know.

Dave

Congratulations to Bill and everyone else at DAQ who worked so hard on this and the other SIPs. This is awesome to see published in the FR! EPA tells us we should see a proposed Clean Data Determination for Provo by the end of the year as well.
